## V-IS20G-8T-2x2.5S

#### **MAIN FEATURES**

Industrial Layer 2 Switch 8 Port 10/100/1000 +2x 2.5G SFP Uplink, Din rail, Ring-Protection Managed, support: Web, CLI, SNMP, VLAN, RSTP/MSTP/ERPS, Dual Power 12-58VDC input, Working Temperature -40°C to +75°C

**Input Voltage:** DC12~58V (Non-PoE)

**Operating Temperature:** -40°C~+75°C

**Shell:** IP40 protection, Fanless design

Anti-static: 8KV-15KV

### **PRODUCT DESCRIPTION**

The equipment is 2\*1000 Base-X, 8\*10/100/1000 Base-T Managed Industrial Ethernet fast switch, through the fanless cooling circuit design, wide range working environment temperature, high protection level and other technologies, provide high / low temperature, lightning protection and other outstanding industrial quality, and integrated switching, safety and various rich protocols, simultaneously supported The public Ethernet multi ring protection technology (ERPS) has greatly enhanced the flexibility of the network and enhanced the reliability and security of the industrial network. It can meet the deployment requirements of rail transit, safe city, intelligent transportation, outdoor monitoring and other harsh environments.

Also known as Industrial Ethernet Switch, which is an Ethernet switch device used in industrial control. Due to the adopted network standard, it is open, widely used, and inexpensive. It uses a transparent and unified TCP/IP protocol. The network has become the main communication standard in the field of industrial control.

Industrial switches feature carrier-grade performance to withstand harsh environments. With a wide range of products and flexible port configurations, it can meet the needs of various industrial fields. The product features a wide temperature design with a protection rating of no less than IP30 and supports standard and proprietary ring redundancy protocols

### **KEY FEATURES**

Industrial protection

Wide range of operating temperature

Surge protection for power

Surge protection for Ethernet port

**Dual Power Supply** 

#### **DIP SWITCH**

1 C/D	Remote PD Reset
2 LGY	Standard/Non-standard PoE Mode
3 VLAN	Port Isolation
4 RST	Reset
