

Xirrus Wireless Array

XR-6000 Series

Configurations: XR-6820, XR-6830, XR-7620, and XR-7630

DATASHEET

Introducing the Xirrus XR-6000 Series

The Xirrus XR-6000 Series Wireless Array is the first modular Wi-Fi product of its kind featuring upgradability, high scalability, high performance and integrated security to economically serve today's requirements without sacrificing for tomorrow's demand.

The XR-6000 Series Arrays deliver 4X the coverage, 8X the bandwidth and user density compared to legacy thin AP solutions. This equates to 75% less equipment, cable runs, and switch ports—resulting in a significant reduction in installation and ongoing management efforts compared to competitive solutions.

The Xirrus XR-6000 Series 16-slot chassis is the industry's only software programmable radio platform supporting multiple configurations with post-installation upgrade options. The Xirrus XR-6000 Series combines unmatched flexibility in wireless standards with the ability to scale a network to meet increasing capacity demands without adding additional devices.

At A Glance

- Configurable with 8 or 16 software programmable radios (2.4GHz or 5GHz)
- Supports 300Mbps or 450Mbps in 802.11n modes
- Supports up to 3840 users
- Field upgradable to add/change radios or new wireless technologies

XR-6000 SERIES 16-SLOT CHASSIS

Shown configured with sixteen multi-state, pluggable radio modules

NSP Architecture for Amazing Performance

The architecture of the Xirrus XR-6000 Series is based upon a Network Services Processor (NSP) that delivers uncompromised performance to all associated users. The design allows for hardware based encryption, compression, acceleration as well as reliable quality of service with uptimes and availability optimized for 802.11n performance and scalability.

Unmatched Upgradability

The Xirrus XR-6000 Series radio upgradeable wireless platform allows a network to scale by adding up to eight radios to each Array. Radios can be purchased in either 300Mbps or 450Mbps versions, and every radio is capable of operating at 2.4GHz and 5GHz. The modular platform ensures support for new wireless technologies and was the first 802.11ac-ready product available.

The Xirrus XR-6000 Series Wireless Array allows a business to incrementally grow a network, expanding capacity to increase the number of supported devices available over time as the demands on the network grow. The modular architecture and multi-band radios protect the investment with the ability to adapt to future standards and capacity requirements.

Ready for the Future

Both the Xirrus XR-6000 Series 16-slot chassis and smaller capacity Xirrus XR-4000 Series 8-slot chassis disrupt the status quo with the ability to scale coverage, bandwidth and capacity without adding additional access points to the network to accommodate growth.

Key Benefits

Upgradable

Adapt to changes in business requirements with the ability to upgrade across Xirrus XR-6000 Series Arrays. Deliver a solution with a true 5+ year life cycle that can incorporate new technologies as they come to market without starting over.

Scalable

Maintain a high level performance for mission-critical applications and support the ability to handle unpredictable device growth throughout your Wi-Fi network. Scale the number of users by adding radios and scale capacity by increasing the network traffic throughput .

Secure

Eliminate potential gaps in security infrastructure with the Xirrus XR-6000 Series integrated firewall, threat sensor and spectrum analyzer providing comprehensive security without the need for additional equipment.

Economical

Deploy 75% less equipment than competitive solutions and reduce the effort to manage and maintain your Wi-Fi network. Realize savings with the Xirrus XR-6000 Series multi-radio design and directional antennas that minimizes the number of devices needed to be deployed resulting in savings in equipment, cables, witch ports, installation time, maintenance and power consumption.

Configuration Specifications

	XR-6820	XR-6830	XR-7620	XR-7630
Chassis Size	17"	17"	17"	17"
Total Radio Slots	16	16	16	16
Populated 802.11n Radios	8	8	16	16
Radio Type	300Mbps Multi-State (2.4GHz or 5GHz)	450Mbps Multi-State (2.4GHz or 5GHz)	300Mbps Multi-State (2.4GHz or 5GHz)	450Mbps Multi-State (2.4GHz or 5GHz)
Maximum Wi-Fi Bandwidth	2.4Gbps	3.6Gbps	4.8Gbps	7.2Gbps
Dedicated Wi-Fi Threat Sensor	Yes	Yes	Yes	Yes
Integrated Antennas	16	24	32	48
Max Wi-Fi Backhaul	1.35Gbps	1.35Gbps	1.35Gbps	1.35Gbps
Integrated Wi-Fi Switch Ports	16	16	16	16
Gigabit Ethernet Uplink Ports	4	4	4	4
SFP+ 10 Gigabit Modular Expansion Port	1	1	1	1
Maximum Associated Users	1920	1920	3840	3840
Radio Interface	2.5Gbps PCI-Express	2.5Gbps PCI-Express	2.5Gbps PCI-Express	2.5Gbps PCI-Express

Technical Specifications

FEATURE	SPECIFICATIONS
RF Management	In-band per IAP spectrum analysis Dynamic channel configuration Dynamic cell size configuration Monitor radio for threat assessment and mitigation Wired and wireless packet captures (including all 802.11 headers) Radio Assurance for radio self test and healing RF monitor
High Availability	Supports hot stand-by Array for mission critical areas
Environmentally Friendly	Supports ability to turn off radios based on schedule configuration
Wireless Protocols	IEEE 802.11a, 802.11b, 802.11d, 802.11e, 802.11g, 802.11h, 802.11i, 802.11j, 802.11n
Wired Protocols	IEEE 802.3 10BASE-T , IEEE 802.3.u 100BASE-TX , 1000BASE-T, 802.3ab 1000BASE-T IEEE 802.1q - VLAN tagging IEEE 802.1AX - Link aggregation IEEE 802.1d - Spanning tree IEEE 802.1p - Layer 2 traffic prioritization

Ordering Information

PART NUMBER	DESCRIPTION
Configured Models	
XR-6820	XR Wireless Array consisting of 16 slot chassis with integrated controller, 8 300Mbps 802.11n modular APs, and ArrayOS operating system
XR-6830	XR Wireless Array consisting of 16 slot chassis with integrated controller, 8 450Mbps 802.11n modular APs, and ArrayOS operating system
XR-7620	XR Wireless Array consisting of 16 slot chassis with integrated controller, 16 300Mbps 802.11n modular APs, and ArrayOS operating system
XR-7630	XR Wireless Array consisting of 16 slot chassis with integrated controller, 16 450Mbps 802.11n modular APs, and ArrayOS operating system

Support & Maintenance

Xirrus is committed to the success of our customers and provides warranties and support options to best fit your needs. Xirrus XR-6000 Series Wireless Arrays ship from the factory with a 5-year hardware warranty. For further information on the Xirrus hardware warranties, software support and premium support offerings visit:

About Xirrus

To organizations who depend on wireless access to transform their business, Xirrus is the wireless network solution provider that provides the world's most powerful, scalable, and trusted solutions. Through product invention and system design, commitment to customer success, and the industry's best price performance, Xirrus gives you confidence that your wireless network performs under even the most demanding circumstances. Headquartered in Thousand Oaks, CA, Xirrus is a privately held company and designs and manufactures its family of products.
