NSS3530 Series Stackable L3 MPLS Access Switch Datasheet

Overview

NSS3530 series switch is a high-performance stackable L3 MPLS access routing switch developed by Maipu. It is applied in enterprise campus network and easy to deploy Layer2/3 switching solution that offers 6*10GE uplinks and modular power supply, Static/RIP/OSPF/BGP/ISIS, L2/L3 Multicast, VST/M-LAG stacking enabled and flexible management. NSS3530 series switch can be used as L3 access or aggregation devices on campus networks. The switches help build highly reliable enterprise campus networks that are easy to expand and manage.

NSS3530 series switch includes NSS3530-30TXF, NSS3530-30TXP, NSS3530-54TXF, NSS3530-54TXP, NSS3530-38GTXF, NSS3530-54GXF six models.

Model Name	Specification
NSS3530-30TXF(V1)	● 24*10/100/1000M Base-T + 6*10G SFP+ ● Dual Modular Power Slots ● RJ45 Console/RJ45 Management/USB2.0 Port ● Switching Capacity: 168Gbps
NSS3530-54TXF(V1)	● 48*10/100/1000M Base-T + 6*10G SFP+ ● Dual Modular Power Slots ● RJ45 Console/RJ45 Management/USB2.0 Port ● Switching Capacity: 216Gbps
NSS3530-30TXP(V1)	● 24*10/100/1000M Base-T + 6*10G SFP+ ● Dual Modular Power Slots ● 380W/760W PoE/PoE+ Budget ● RJ45 Console/RJ45 Management/USB2.0 Port ● Switching Capacity: 168Gbps
NSS3530-54TXP(V1)	● 48*10/100/1000M Base-T + 6*10G SFP+ ● Dual Modular Power Slots ● 380W/760W/1440W PoE/PoE+ Budget ● RJ45 Console/RJ45 Management/USB2.0 Port ● Switching Capacity: 216Gbps

Model Name	Specification
NSS3530-38GTXF(V1)	24*1G SFP + 8*10/100/1000M Base-T + 6*10G SFP+ - Dual Modular Power Slots - RJ45 Console/RJ45 Management/USB2.0 Port - Switching Capacity: 184Gbps
NSS3530-54GXF(V1)	48*1G SFP + 6*10G SFP+ - Dual Modular Power Slots - RJ45 Console/RJ45 Management/USB2.0 Port - Switching Capacity: 216Gbps

Key Features

● **Intelligent Stacking Technology**

The NSS3530 series switch is equipped with Maipu VST stacking function that allows a minimum of four devices to be stacked into one logical device via the 10G SFP+ ports. VST Virtual Switching Technology) stacking combines multiple switches to form a logical virtual switch, improving device and link reliability, network expansion, and simplifying configuration and management.

The NSS3530 series switch also support M-LAG, aggregating links of multiple switches to ensure link backup and uninterrupted services during upgrade.

● **Software Defined Network**

The NSS3530 series switch is capable of being managed by Maipu's BD-LAN controller, an integrated SDN platform designed for campus networks. The utilization of software-defined network technologies in this platform simplifies the deployment, management, and security of campus networks, while also enabling network teams to complete the majority of their work directly on the BD-LAN controller platform. When compared with traditional methods, implementing a BD-LAN solution can significantly reduce network deployment times, simplify network maintenance, improve troubleshooting efficiency, and ultimately lead to overall cost savings for customers.

● **Advanced MPLS Capabilities**

The NSS3530 series switch delivers advanced MPLS capabilities, enhancing your network infrastructure with powerful features. These include seamless MPLS VPN deployment for secure and efficient data transmission, MPLS Traffic Engineering for optimized traffic routing, and MPLS Quality of Service (QoS) support for prioritizing critical applications.

● **Zero Touch Provisioning**

The NSS3530 series switch features advanced Zero Touch Provisioning (ZTP) capabilities, streamlining the deployment process for network administrators. With ZTP, the switch can automatically discover and load necessary version files from a file server via a DHCP server or a USB flash disk, eliminating the need for manual intervention during initial setup. This automation reduces configuration errors, accelerates the deployment process, and enhances overall network efficiency, making the NSS3530 series switch an ideal choice for scalable and dynamic network environments.

● **High Availability**

The NSS3530 series switch offers advanced redundancy and reliability features, catering to diverse networking requirements. In addition to supporting traditional spanning tree protocols such as STP, RSTP, and MSTP, the switch also complies with the ITU-T G.8032 international standard. This Ethernet Ring Protection Switching (ERPS) protocol enables rapid 50ms failover within Ethernet ring network topologies, ensuring seamless connectivity and minimal downtime.

Furthermore, the NSS3530 series switch incorporates the Virtual Router Redundancy Protocol (VRRP), facilitating uplink backup capabilities. By connecting to multiple aggregation switches via multiple links, the switch significantly enhances access device reliability, promoting network stability and resilience.

- **Perfect Security Policy**

The NSS3530 series switch offers a comprehensive suite of security features, including user authentication, port security, ACLs, loopback detection, and 802.1X authentication. It also incorporates IP Source Guard, DHCP/ND Snooping, Host Guard, Dynamic ARP Inspection, and PPPoE+ security mechanisms. These robust security functions ensure user access and network protection.

Additionally, the switch supports MAC+IP+VLAN binding, 802.1X authentication, and countermeasures against network storm, DOS/DDOS, ARP, and protocol packet attacks. This makes the NSS3530 series ideal for large-scale, multi-service, and complex-traffic networks.

- **Advanced QoS**

The NSS3530 series switch offers sophisticated QoS capabilities for optimal network performance. Supporting eight queues per port and advanced scheduling algorithms such as SP, RR, WRR, and WDRR, the switch effectively manages traffic prioritization and resource allocation.

The switch accommodates diverse priority mapping techniques, including 802.1p, CoS, and DSCP, enabling fine-grained control over traffic classification and prioritization. With granular port traffic rate limiting and time-based controls, network administrators can regulate bandwidth usage as needed.

To optimize network performance and minimize congestion, the NSS3530 series switch employs advanced congestion management techniques, such as Tail Drop and RED packet loss algorithms. These mechanisms help maintain seamless network operation while ensuring efficient delivery of critical data.

- **IPv4&IPv6 Dual-stack Ability**

The NSS3530 series switch is built on an IPv4/IPv6 dual-stack platform, delivering hardware-based, wire-speed forwarding for both IPv4 and IPv6 traffic. The switch supports IPv4/IPv6 Layer 3 routing protocols, including RIPng, OSPFv3, BGP4+, and IS-IS for IPv6. These IPv6 capabilities enable seamless deployment on pure IPv4, pure IPv6, or dual-stack networks, facilitating a smooth transition from IPv4 to IPv6 infrastructure.

- **Rich Network Management**

The NSS3530 series switch offers a comprehensive set of management options. These options encompass network management protocols like SNMP and TR-069, configuration and control options like Netconf/Yang and CLI, monitoring and diagnostic tools such as RMON and SYSLOG. These versatile features enable network administrators to effectively manage, monitor, and maintain optimal network performance locally

- **Free Licensing Policy**

Maipu consistently adheres to a "One-time investment" free license policy, ensuring that standard and advanced features are not differentiated across versions. This approach guarantees that customers receive new firmware updates without incurring additional charges. In comparison to other manufacturers, Maipu's free license policy safeguards both short-term and long-term user investments, providing an unparalleled value proposition.

NSS3530 Series L3 MPLS Access Switch Datasheet

Order Information

Series	Model	Description
NSS3530 Series Host		
NSS3530 Series	NSS3530-30TXF	V1 Version: 24*10/100/1000M Base-T interfaces, 6*1/10G SFP+ interfaces, Dual Power Supply Slots
	NSS3530-54TXF	V1 Version: 48*10/100/1000M Base-T interfaces, 6*1/10G SFP+ interfaces, Dual Power Supply Slots
	NSS3530-30TXP	V1 Version: 24*10/100/1000M Base-T interfaces, 6*1/10G SFP+ interfaces, 380W/760W PoE&PoE+, Dual Power Supply Slots
	NSS3530-54TXP	V1 Version: 48*10/100/1000M Base-T interfaces, 6*1/10G SFP+ interfaces, 380W/760W/1400W PoE&PoE+, Dual Power Supply Slots
	NSS3530-38GTXF	V1 Version: 24*1G SFP interfaces, 8*10/100/1000M Base-T interfaces, 6*1/10G SFP+ interfaces, Dual Power Supply Slots
	NSS3530-54GXF	V1 Version: 48*1G SFP interfaces, 6*1/10G SFP+ interfaces, Dual Power Supply Slots
Power Module		
Power Module	AD75M-HS0N	75W AC Power Module (For NSS3530-30TXF/54TXF/38GTXF)
	AD150M-HS0N	150W AC Power Module (For NSS3530-54GXF)
	AD500-1D005E	500W AC Power Module (For NSS3530-30TXP/54TXP)
	AD880-1D005E	880W AC Power Supply Module (For NSS3530-54TXP)
Stacking Cable		
Stacking Cable	SFP-STACK-15	High speed stacking cable, SFP+ to SFP+,10Gbps, L=1.5m
	SFP-STACK-30	High speed stacking cable, SFP+ to SFP+,10Gbps, L=3.0m
	SFP-STACK-50	High speed stacking cable, SFP+ to SFP+,10Gbps, L=5.0m

Typical Application

SDN Campus LAN Network
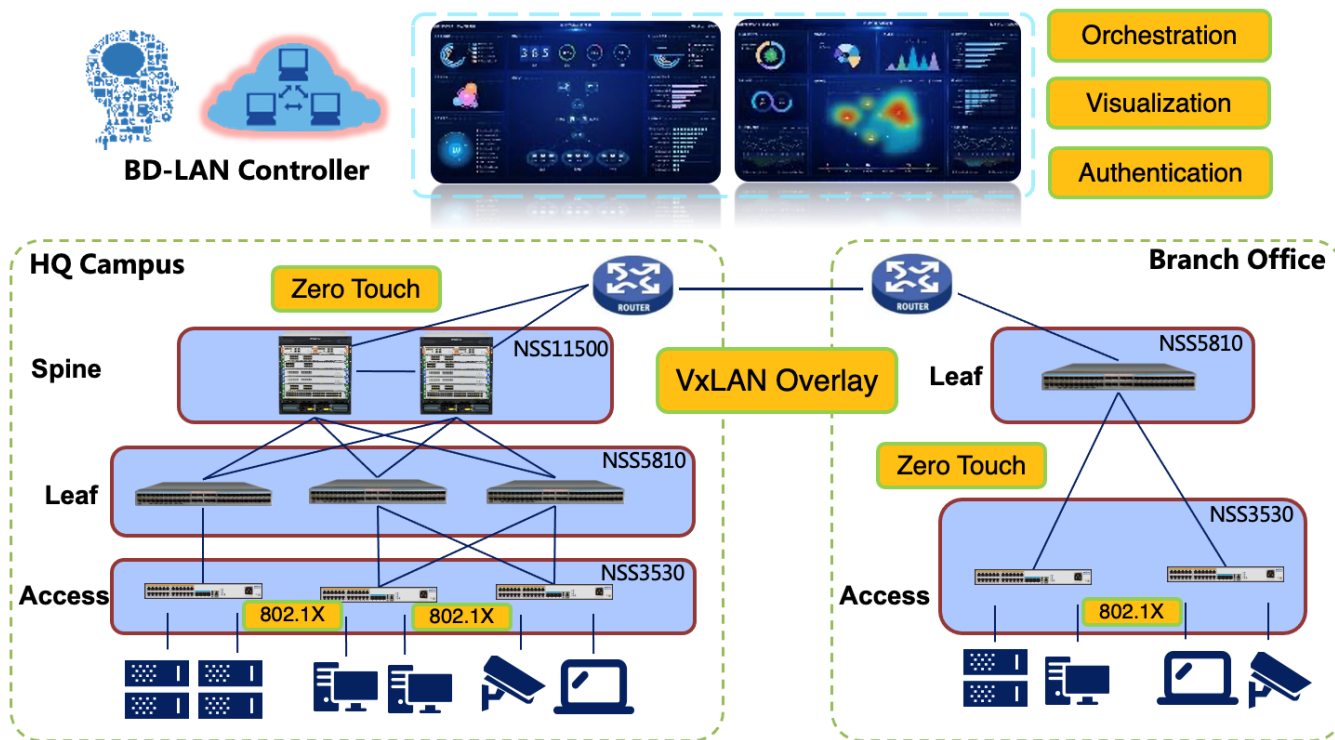

ISP Metro Ethernet Network
